Solution for 'multiple definition of yylloc' error

8 August, 2020 • Banana Pi M4 • devel

When building BPi-M4 BSP, if you are facing the following error,

```
usr/bin/ld: scripts/dtc/dtc-
parser.tab.o:(.bss+0x10): multiple
definition of 'yylloc'; scripts/dtc
/dtc-lexer.lex.o:(.bss+0x0): first
defined here

collect2: error: ld returned 1 exit
status
```

edit the file ./linux-rtk/scripts/dtc/dtc-lexer-lex.c

Find the line '**YYLTYPE yylloc**' and change it to '**extern YYLTYPE yylloc**'
